

QUALITY BUILT TEMPORARY BUILDINGS.

Durability and strength, wherever you need it.

Accu-Steel temporary buildings are the perfect solution for virtually any application, from temporary warehouse structures to marine storage buildings, from recreational use to construction sites. With our temporary buildings, you get the unsurpassed quality that sets our fabric-covered buildings apart plus the unbeatable versatility of a temporary structure. And because our temporary buildings can be easily relocated, Accu-Steel is the ultimate choice for your portability needs.

Cranable

Cranable temporary buildings allow us to build the structure in one location and lift the completed product to its final destination quickly and easily. This option is ideal for areas that are difficult to access, or for sites that are difficult to build on. Our cranable buildings are also preferred when covering existing structures or materials that cannot be moved.

Wheel-mounted

Our wheel-mounted buildings are custom-designed for your specific application and can expand and contract depending on the kind of coverage you need. Because you're able to store the smaller component inside the larger structure, this type of temporary building is ideal if you need the versatility of multiple-sized buildings in one.

Why choose Accu-Steel temporary buildings?

ECONOMICAL

Our temporary buildings are capable of performing multiple building functions within one structure, saving you money without sacrificing quality.

EFFICIENT

We use energy-friendly fabrics that provide natural light and temperature control, providing you an additional cost savings. Temporary buildings also provide an easy way to protect against harsh weather and the elements.

EFFORTLESS

Engineered to meet the wind and snow load requirements of most building codes, our temporary buildings not only save you the hassle of applying for zoning permits, but they also meet the wind and snow load requirements of most building codes.

We're committed to meeting your temporary building needs. See which of our two building options is right for you and your business.
